NOTES:

- 1) For this update, the methodology for ranking hazards was changed. Localities were not actually tasked with scoring/ranking covered hazards directly. Table 6.17 in Section 6 of the Plan shows the risk ratings for the region based on quantitative and qualitative analysis as well as anecdotal input from the Project Management Team, but is not based on a locality ranking system. As a result, the "Hazard Ranking" table that appeared in the local appendices for the previous Plan updates has been supplanted by the "Hazard Risk Ratings" table (Table 6.17) in Section 6.
- 2) For the status of mitigation actions, any actions that were removed per previous Plan updates are not shown in this update. This section was also amended to list actions completed per prior Plan updates separately.

The Town of Farmville regulates building permits for construction in flood hazard areas based on the Town's Zoning and Subdivision Ordinance. Section 29.23 establishes a floodplain overlay district, which restricts new construction in the floodplain and outlines permitting requirements in the floodplain. The Town is currently in the process of developing written policies and procedures to explain its process for determining SI/SD. The Town hopes to have this process complete in 2024. The Town staff have advised that they are not aware of any permits issued for new construction in the floodplain since 2013, indicating no increase in development in those areas.
